

# Master in Finance

Learn how to understand and use complex quantitative models to solve real financial problems in today's global market.

**This specialized program will equip students coming from a business or economics background with a thorough knowledge of the theory, practices and concepts of all major areas of finance.**

- Develop the edge you need to pursue analyst-level or associate-level positions in investment banking, investment management, financial consulting, diversified financial services, private equity, asset management and more.
- Obtain two master's degrees in 12 months: Study in Antwerp and in New York, the financial center of the world. Work with people from all over the world and become part of an international professional network.
- Improve your computer skills and get trained in computer applications that will be useful to you in all kinds of financial positions and sectors.

## Career Prospects

Graduates from this program start working in a variety of companies:

BNP Paribas Fortis, TriFinance, Belfius, Henkel, Egyptian Gulf Bank, Deutsche Bank, KPMG, ABN AMRO Bank, Zanders, The startup garage, BP, Hitec Vision.

*“Bridging a solid theoretical background with hands-on practice, you gain expertise in risk management, asset management and global management, directly applicable to your future professional career”*  
— Prof. Dr. Marc De Ceuster, Academic Director

*“The Master in Finance was an obvious choice as I wanted to deepen my knowledge and expertise in Finance. In addition, meeting interesting people from all walks of life also considerably improved my soft skills. After 10 months, I realized nothing is impossible as long as you work hard and keep on challenging yourself!”* — Alumna Kate Bahdanovich

Note: All courses are subject to change
